6" Recessed Downlight

Order Part# 4056

WOOD MOULDING TRIM KIT:

Order Part# 4057 (Alder-stainable)
4058 (Poplar-paintable)

The Dome is a 46" octagonal recessed lighting fixture frame that offers unlimited design & color options. **The Dome** provides graceful elegance to any room because it heightens the ceiling and enlarges a room's appearance. The classical Tiffany look of a dome is a timeless addition to any home.

Lighting of the decorative glass panels can be achieved either by artificial lights above the frame and/or by a standard roof-mounted skylight.

Our frame holds 25 flat decorative glass panels that are securely held in place by gravity using our patented* interlocking panel design. They lift out easily for cleaning or changing of light bulbs.

Your dealer offers glass panels in many designs and colors. Choose from inexpensive solid color opaques, simple modern geometrics, and elaborate classical designs. Because the glass panels are easily removed and stored, you can change to special theme designs for different seasons and holidays.

To add a recessed downlight fixture made by Juno Lighting, Inc. or to hang a chandelier from **The Dome**, order one of the optional top plates.

And an optional, pre-cut, decorative wood trim moulding kit adds the finishing touch to **The Dome**.

The Dome frame comes complete with assembly instructions and installation guidelines.

The Dome

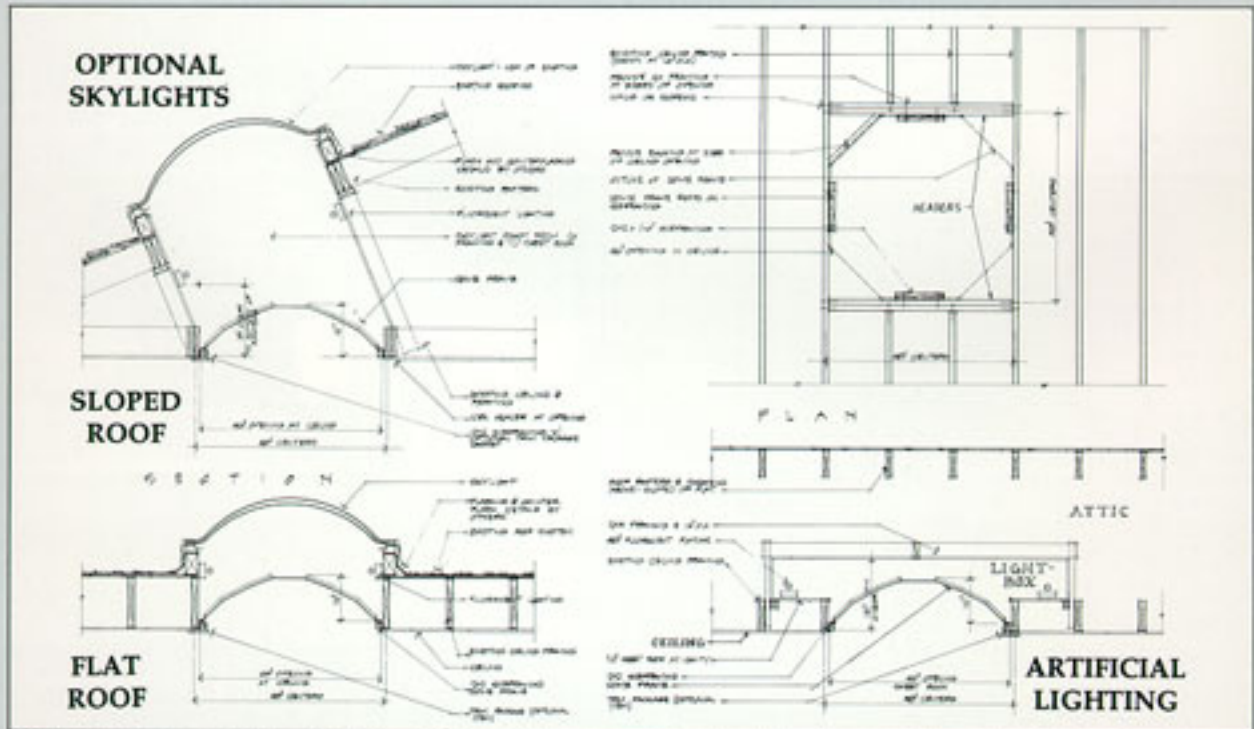

The Dome installs easily in your ceiling, and requires only 15" of vertical clearance above a flat ceiling. It is designed to fit between four ceiling joists on 16" centers or three joists on 24" centers and is mounted on short 2x2's nailed to the joists. While not designed for exterior applications, it can be installed in flat roofs under a standard 4' dome skylight. One with a white bubble offers the best lighting and energy efficiency. (Note: Existing structures that have roofs & ceilings supported by trusses rather than joists require re-engineering of the framing system.)

Lighting is achieved by either artificial fluorescent lights mounted in a simple sealed "lightbox" above The Dome's frame and/or natural sunlight from a standard dome skylight mounted in the roof.

The Dome can be installed in one day by a professional carpenter. For the do-it-yourself person, a step-by-step article on how to install The Dome is available on request.

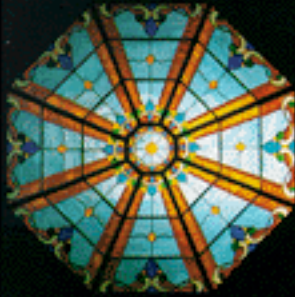

TYPICAL INSTALLATIONS

DISCLAIMER: Selection of Sierra Stained Glass products to conform to all local applicable laws, ordinances, building codes, and safety requirements is the sole responsibility of the architect, house/building owner and/or contractor. Proper installation of our products is the responsibility of the customer. Sierra Stained Glass Studio, Inc. has no responsibility in these regards.
